Operational Impact

Workflow Efficiency & Unit Economics

HawkFranklin Research

02 | PRE-CONSULTATION EFFICIENCY FOR TELE-MEDICINE

Workflow Comparison

+10 PATIENTS / 5HR SHIFT

TRADITIONAL (NO AI) — 10 MIN / PATIENT

Consultation (10m)

6 Patients / Hour

WITH PELLISCOPE — ~10 MIN TOTAL (PARALLELIZED)

Preliminary Diagnosis (3m) | Focused Consult (7m)

AI triage saves 3 mins of discovery time per patient

8 Patients / Hour

Model Performance (AUC)

Zero-shot comparison on dermatology benchmarks

Grok-4	0.70
GPT-5	0.81
Gemini 2.5	0.82
PelliScope	0.86

Technical Accuracy: 80.2%

Infectious vs Non-infectious flag

10-condition panel

Eczema, Allergic Contact Dermatitis, Insect Bite, Urticaria, Psoriasis, Folliculitis, Irritant Contact Dermatitis, Tinea, Herpes Zoster, Drug Rash.

UNIT ECONOMICS (DAILY)

INFRASTRUCTURE COST

$2.50

Daily Compute Spend (6 Hours)

MACHINE SPECS

8 Core CPU
16 GB RAM

CPU Edge Inference

"A single machine costing less than a cup of coffee per day drives this entire workflow."

CLINICAL REVENUE GAIN

US & UAE Ready

$800+

Daily Additional Revenue

10+ Add. Patients

@ $80 avg. consult fee

TWO-LEVEL SCREENING

1. **Infectious vs Non-Infectious**
   Immediate triage for Patient/User safety.
2. **Differential Diagnosis**
   Top 10 most frequent skin conditions.
